

PROJECT & PROGRAMME MANAGEMENT

HMP recognise that every Project, and indeed every Client, is different with unique needs and challenges. We recognise the importance of balancing talking and listening to foster candid dialogue and to establish what it is you actually require, what your key drivers are and how you like to operate.

Our management philosophy is a simple, and we believe in a 'common sense' approach.

"PROVING PRAGMATIC AND SENSIBLE SOLUTIONS TO COMPLEX PROBLEMS"

HMP will take ownership and responsibility for all aspects of the project from inception through to completion and deliver. We will at the outset establish clearly defined objectives and identify the best solutions for delivering these.

"TRANSLATING STRATEGIES INTO SPECIFIC GOALS, TACTICS, ACTION PLANS AND DELIVERABLES"

We have extensive experience in establishing and managing multi-disciplinary and integrated teams across a wide variety of projects and from inception through to final handover. In accordance with our key business philosophies we will facilitate and manage the project team to create a positive environment ensuring maximum effectiveness and enthusiasm.

We recognise that in order to make informed decisions and to forward plan Clients need 'trusted' information and a high level of certainty. We will put in place tried and tested management and control systems and in addition develop relationships with the sole aim of becoming 'a safe pair of hands' for our Clients.

Our tried and tested management strategies have been proven to deliver savings in cost, reductions in accidents and defects and improvements in Client satisfaction.

"A MODEL FOR SUCCESS THAT WILL SET THE BENCHMARK ON FUTURE PROJECTS"
